Who am I

I'm a full-stack web and mobile developer based in Halifax, NS, with over 2 years of hands-on experience building real products — from solo MVPs to client apps and open source contributions. I work mostly with React, React Native, Next.js, Typescript and Node.js, and I'm especially interested in clean, scalable architecture and creating tools that actually help people.

Experience

Co-Founder and Software Developer @ Everpine *(January 2024 – Present)*

 <https://everpine.ca/>

- Co-Founded and run a small software development studio focused on delivering full-stack solutions to startups and small businesses
- Led development of **Train With Us**, a social fitness event app, from solo MVP to TestFlight release; grew team to 2 developers and shipped core features including event discovery, profiles, and RSVP system
- Built and launched a Shopify storefront for a local youth sports organization, collaborating with our Shopify specialist to implement custom Liquid theming and app integrations; helped drive consistent merchandise sales
- Managed client communication and project scoping to align technical work with business needs

Software Developer @ Train With Us *(Start Up, Feb 2024 – April 2025)*

 <https://trainwithus.app>

Tech: React Native, Expo, Supabase(PostgreSQL)

- Sole developer responsible for planning, designing, and building a social fitness event and community/gym app from scratch
- Shipped a full MVP to real users via TestFlight in under 9 months; handled product decisions, UX, and technical implementation
- Used Supabase's client SDK for auth, real-time data, and Postgres queries without a custom backend
- Built core features including event creation and management, community/gym creation and management RSVP system, profile management, direct/group messaging, profile matching
- Integrated push notifications and social logins using Expo's SDK to streamline user onboarding
- Deployed builds with EAS and managed the TestFlight pipeline for feedback collection

Contributor @ Alveus Sanctuary (Open Source, April 2025 – Present)

 <https://github.com/alveusgg/website> / <https://www.alveussanctuary.org/>

Tech: T3 Stack (NextJs, TypeScript, Prisma, tRPC)

- Diagnosed and fixed a long-standing backend garbage collection issue in the notification system
 - Implemented support for HEIC/HEIF and AVIF uploads, improving UX for image-heavy submissions on the show-and-tell platform
 - Active contributor participating in issue discussions, PRs, and code reviews
-

Skills

Languages: TypeScript, JavaScript, SQL, Swift, HTML, CSS

Frameworks & Libraries: React, React Native, Next.js, Node.js, Express, SwiftUI, Tailwind CSS, tRPC

Databases & ORMs: PostgreSQL, MongoDB, Firebase, Supabase, Prisma

Tools & Testing: Expo, EAS, Git, Docker, Jest, Webpack, GitHub Actions

Cloud & Deployment: Vercel, Netlify, Heroku

Education

FullStack Web Development — University of New Brunswick (2023)

Other Experience

Administrative Assistant — Blended Athletics (March 2021 – Present 2025)

 <https://blendedathletics.com/>

- Managed client communication and relationships, ensuring timely and professional service
- Performed event and advertisement photography/videography for use in marketing and social media campaigns
- Supported daily operations, and logistics in a fast-paced small business
